

LATHE

Presenting Kennametal's Threading/Grooving/Cut-Off High-Performance Suite

A2™ Cut-Off System

At even the highest feeds and speeds, insert will not move – that means exceptionally long tool life and chip control!

A3™ Deep-Grooving System

Perform OD or ID operations – and face-grooving – all with the same insert!

A4™ Turn & Groove System

Double your parts-per-edge...with no decrease in speed, feed, or depth of cut!

Top Notch® Threading & Grooving Systems

Superior clamping design delivers unsurpassed surface finishes and workpiece quality – whether you're coarse or heavy-duty threading, grooving, back-turning, or undercutting!

LT™ Laydown Threading System

Three cutting edges yield more pieces per insert — no matter how complex your application!

Kennametal will significantly boost your lathe productivity and profitability!

Let us prove it.
