

MBA Final Exam

You're offered a chance to save 10% of one slice

Which do you choose:

- a) 10% of A
- b) 10% of B

The C-suite is a long way from B-school, which probably explains why so many of your peers have forgotten their lessons. They're content to find "savings" by nickel-and-diming the vendors whose costs make up the smallest parts of their manufacturing pie. But when you work with Kennametal, we'll show you ways to reduce your entire manufacturing cost by enough to actually pay for the cost of tooling. In fact, we guarantee it. Find out more at kennametal.com.
