

If you think shingles can take a pounding,
you should see what they do to recycling equipment.

What problem can we solve for you? When shingles are replaced, the asphalt gets recycled. But this abrasive material quickly wears down equipment. So we created tough fasteners that last 100 hours instead of 4 and grinders that last 8–10 times longer. Our metallurgical engineers can find similarly innovative solutions to the problems you're facing, then deploy and support them globally. Find out more at kennametal.com.
