

Put your new project in the hands of those who know Project Engineering best!

ENGINEERING

New Project Engineering Services

Kennametal can provide your engineering teams and machine tool builders with process engineering support, advanced metalcutting technologies, and project management expertise to help you achieve:

- Accelerated time-to-market.
- Best-in-class processes.
- Lowest cost implementation.
- Reduced risk on new technology implementations.

Using Innovation to Create Competitive Advantages

Kennametal's New Project Engineering Services have supported the successful launch of hundreds of new manufacturing lines worldwide in the automotive, aerospace, heavy equipment, general engineering, refrigeration equipment, railroad equipment, and marine sectors.

Our value-added services include:

- LEAN process development.
- Custom tooling.
- Cost assessments.
- Scheduling, monitoring, and procurement.
- Global logistics and run-off support.
- Operator training.
- Engineering documentation.

A Proven Methodology and Partnership

Successful project engineering requires planning, teamwork, and disciplined execution. Through our extensive experience in developing and implementing New Project Engineering strategies, Kennametal has pioneered a proven methodology to help you manufacture new products and bring them to market quickly. Service deliverables are carefully outlined and jointly agreed to before the project begins. We then formally evaluate progress and results with you throughout the project through our stage-gate management system:

Kennametal Shared Rewards Program

Kennametal's Shared Rewards Program enables you to invest your tooling spend with a partner completely dedicated to the optimization of your production processes.

In fact, we often deliver cost savings that exceed your annual tooling purchases of Kennametal's industry-leading brands!
