

# Machine Tooling Segment

## Markets Served

The Kennametal Machine Tool segment serves machine tool builders and their distributors/dealers who provide machines to manufacturers of engineered components around the world.

## Leadership Position

Kennametal produces cutting tools for almost any application, and provides total tooling solutions for the most demanding manufacturing needs. Over seven decades we have become the world leader in:

- Tooling Design
- Build
- Application

## Machine Tooling Segment

### Industry Recognition

Innovations, such as our renowned KM™ Quick Change tooling system's ISO Standard, have earned us much recognition.

- Ford India 2010 Supplier Excellence Award
- Honda North America 2010 Supplier Excellence Award
- 2010 Outstanding Corporate Innovator Award
- Caterpillar Supplier Quality Award 2008–2009
- Five-time winner of the GM Supplier of the Year Award

### Key Differentiators

Our Advanced Engineering team and our skilled and experienced application engineers are the leading resource for companies seeking total engineered solutions.

- Maximize productivity of machine tools and manufacturing processes
- Provide technical applications assistance
- Employ global best practices
